Help Prevent Water Lines From Freezing Now

Every winter, many homes and business owners face the inconvenience and expense that come with frozen water pipes. With below freezing temperatures possible through our winter season, now is a good time to review ways to protect household pipes from freezing temperatures.

Following are a few bullet points of simple measures ECUA customers can take to ready their home's plumbing for winter's freezing temperatures. Visit the Advisories section on our website at ecua.fl.gov for more detailed information on how to address each of these points:

- ◆ Disconnect and drain outdoor hoses

Remember, external, exposed pipes are naturally the most vulnerable to freezing so it's important to prepare now!
